4. How Do You Identify the Right Property?

Finding value and potential in today's market

Change 1: Removal of the 15-month wait-out period for private residential property owners purchasing PropNex non-subsidised HDB resale flats

What Changed?

- Private homeowners who sell their homes can now **buy a HDB resale flat immediately!**
- 15-month wait-out period **removed with immediate effect**

Private Residential Property Owners

Looking to buy non-subsidised HDB resale flat (without HDB loan)

15-Month Wait-Out Period Removed

Effective
Immediately

Can buy HDB resale flat immediately

No more waiting

**Why do you think the
Government is comfortable
making this change now?**

Why Now?

- 15-month wait-out period introduced in 2022 to cool HDB resale market during post-pandemic supply crunch
- Its removal comes after **several quarters of price moderation in HDB resale market & ramp up in new flat supply**
- HDB resale prices: **-0.4% in 1H 2026**
- Reflects the government's view that **HDB resale market conditions have stabilised**

S'pore raises 2026 GDP growth forecast to 4.5%-5.5% on AI boom

Economy grew 5.9% year on year in second quarter, beating advance estimate of 5.7%

Angela Tan
Senior Business Correspondent

Singapore has sharply raised its economic growth forecast for 2026 to 4.5 per cent to 5.5 per cent, up from an earlier 2 per cent to 4 per cent range, on the back of a stronger-than-expected first-half performance and a surge in global AI-related capital spending.

The surprise upgrade has prompted some economists to reassess and raise their own forecasts for the country's gross domestic product (GDP) growth in 2026.

Singapore's economy grew by 5.9 per cent year on year in the second quarter, easing from the 6.3 per cent expansion in the previous quarter. The growth was slightly

higher than the advance estimate of 5.7 per cent.

On a quarter-on-quarter seasonally adjusted basis, the economy expanded by 1.4 per cent, extending the 1.2 per cent growth in the first quarter.

As a result, the Republic's GDP growth came in at 6.1 per cent year on year for the first half of 2026.

Beh Swan Gin, permanent secretary at the Ministry of Trade and Industry, said at a virtual media briefing on Aug 11 that since the previous forecast in May, the global artificial intelligence investment boom has been stronger than expected. This has provided significant tailwinds for AI-related production and exports globally.

For the rest of 2026, a further acceleration in AI-related capital ex-

penditure is expected to lift the growth prospects of economies plugged into the global technology value chain.

Beh noted that the 2026 GDP growth forecasts of regional economies such as South Korea, Taiwan and several South-east Asian countries have been upgraded.

Compared with a year earlier, GDP growth in the second quarter was driven by the strong performance of the manufacturing, wholesale trade and finance and insurance sectors.

The manufacturing sector expanded by 12.5 per cent year on year in the second quarter, extending the first quarter's 7.3 per cent growth. Growth was largely driven by expansion in the electronics and precision engineering clusters on the back of robust AI-related demand.

There was a second consecutive quarter of contraction in the chemicals and biomedical manufactur-

ing clusters.

The wholesale sector grew 8.3 per cent compared with the same period in 2025, following 13.6 per cent growth in the first quarter.

This growth was mainly driven by higher sales of machinery and equipment, especially telecommunications products, computers and electronic components.

The finance and insurance sector grew 6.2 per cent compared with the same period in 2025, and up from 5.3 per cent in the previous quarter.

Growth was mainly driven by banks, which benefited from strong lending and fee income. Fund management also performed well, with fees and commissions recording double-digit year-on-year growth.

By contrast, the food and beverage (F&B) services sector contracted, partly owing to a sustained increase in outbound travel by residents and a decline in visitor arrivals during the quarter.

Beh said the impact of the Middle East conflict was less severe than initially feared.

While the disruption to oil supplies has pushed energy prices up, countries have used existing oil reserves and switched to other energy sources, limiting price increases.

However, ongoing tensions and lower oil reserves are likely to keep energy and other input prices high in 2026. This would, in turn, exert upward pressure on global inflation and weigh on economic activity.

Meanwhile, US tariffs are expected to continue weighing on the exports of affected economies.

"On balance, Singapore's external demand outlook for 2026 has improved," Beh said.

As far as trade is concerned, Singapore does not for now anticipate an impact from the 12.5 per cent tariff imposed on exports to the US. Beh said the tariff affects about a third of exports from Singapore to the US, about \$9.4 billion annually.

He said the AI boom is unlikely to cause much inflation for now. Inflation pressure is more likely to come from rising prices of fuel and commodities such as fertiliser and food. Core inflation is expected to stay between 1.5 per cent and 2.5 per cent for now.

Beh said Singapore is not relying only on the AI boom. The country's growth has been broad-based, benefiting sectors such as finance, infocommunications, precision engineering and wholesale trade, while construction remains resilient.

However, some sectors, especially those affected by petrol and petroleum-related feedstock – such as the chemicals sector and the F&B industry – are still struggling.

The global economy still faces risks – in particular, rising conflict in the Middle East, more US tariffs or investors suddenly becoming worried about AI-related spending.

Against this backdrop, industries linked to the global AI boom, like electronics and precision engineering, are expected to do better.

Industries affected by Middle East supply disruptions, especially chemicals, petroleum and petrochemicals, could remain weak because companies have less crude oil and feedstock to work with.

Fuel and chemicals trading may decline. Higher fuel prices could reduce air and sea transport demand and make travel more expensive, slowing hotel-sector growth.

Information and communications should grow strongly because

GuocoLand's River Modern sells 90% of units on launch weekend at average price of S\$3,266 psf

Real estate agencies say the robust sales reflect sustained demand for Core Central Region projects

By Paige Lim
paigelim@sp.com.sg

RIVERMODERN condominiums River Modern at River Valley moved 90 per cent of its units – 410 of the 455 in total – at an average price of S\$3,266 per square foot (psf) over its launch weekend, said developer GuocoLand on Sunday (Mar 8).

The apartments sold were priced from S\$1.5 million for a two-bedroom unit to S\$6.7 million for a four-bedder. The highest selling price recorded was S\$3,693 psf.

The 99-year leasehold project has a District 9 address and comprises 455 residential units across two 16-storey blocks. It occupies a 126,325 square foot (sq ft) site, with about 4,300 sq ft of commercial shops on the first storey.

GuocoLand noted strong demand for all unit types, with Singaporeans and permanent residents accounting for nearly all the buyers. The majority are owner-occupiers across a range of household sizes, from singles to multi-generational families.

Modern was the best-selling private residential non-landed project in 2020 to date, based on units and percentage.

He added that the shrinking premium of units in the CCR region over developments in the rest of Central Region "presented a value proposition that many buyers found hard to ignore".

Moham Sandrasegaran, head of

THE BUSINESS TIMES

March 30, 2026

Pinery Residences sells 92.5% of units at average price of S\$2,546 psf at launch

A significant proportion of buyers could be upgraders from within Tampines, say real estate players

By Elyvia Tan
elyviatan@sp.com.sg

PINERY Residences, a Tampines project by Hui Hup Realty and Sunway MCL, sold 544 units, or 92.5 per cent of its 588 units over its launch weekend, at an average selling price of S\$2,546 per square foot (psf).

The mixed-use development recorded robust demand across all unit types, the developers said in a Sunday (Mar 28) media statement, adding that Singaporeans and permanent residents accounted for nearly all buyers.

The strong sales achieved at launch reflect the project's compelling value proposition and the continued demand for well-located integrated developments in established residential areas. "Hui Hup and Sunway added."

The development comprises six blocks of 14-storey residential units, sitting atop a 121,000 square foot mall, and is linked with Tampines West MRT station on the Downtown Line.

Moham Sandrasegaran, head of research and data analytics at ST, noted that two-bedroom units were sold out, while three-bedders configurations were nearly completely taken up.

"This suggests strong participation from a wide buyer pool, including young couples, families and HDB upgraders," he said.

Huttons Asia chief executive officer Mark Yip said buyers of the two and three-bedroom units were likely investors and smaller families. He added that four-bedder units were sold out.

"Tampines Data Analytics estimates a mix of 40 to 20 owner-occupiers and investors for Pinery Residences," he added.

Marcus Chu, CEO of ERA Singapore, said there was spillover demand from buyers who missed out on recent executive condominium (EC) launches, such as for Rivelle Tampines, as well as those above the EC income ceiling.

PropNex CEO Kelvin Fong and Che said Pinery Residences's strong performance was comparable with the healthy demand for past integrated developments, both high-

Pinery Residences recorded robust demand across all unit types, with nearly all buyers being Singaporeans and permanent residents. PHOTO: HUI HUP REALTY, SUNWAY MCL

lighting. Parkview Residences in Tampines Avenue 11 is particularly popular, residents achieved a take-up rate of about 87 per cent during its February 2025 launch weekend, with sales since increasing steadily to about 96 per cent.

"This reflects not just project-specific attributes, but also the strength of Tampines as a mature regional centre with a vibrant upgrader base and sustained housing demand," he added.

Tampines appeal

Real estate players agreed that a

launching River Modern and Rivelle Tampines.

While the war in Iran has hit trend stock markets and darkened economic outlooks, demand for recent residential launches seem to have been unaffected. Niu said.

This could be due to the longer investment horizon of many homebuyers, which is typically more than four years because of the four-year duration of the seller's stamp duty," he suggested.

Many property buyers would hold the view that four years from now, the negative impact from the Iran war would have dissipated.

Chu of ERA noted a tightening private housing supply in the region, with no upcoming government land sales in the area in Tampines and only one other new private home launch expected in the next five years. This scarcity of new options positions Pinery Residences well to capture pent-up demand, he said.

Mak said the G25 tender for a residential site at Dover Drive – which drew a supply of S\$1,530 psf per plot ratio, the highest land rate for a 99-year leasehold G25 residential site in the history of the Bala Vista and one north area – could have boosted the confidence of homebuyers at the launch of Pinery Residences.

The bids showed developers' confidence that property prices would continue to rise in the next few years, he added.

Observing that "the introduction of new sites in Tampines appears to be well aligned with underlying housing demand," SRI's Sandrasegaran said it suggested the calibrated ramp-up in supply has been timely, supporting market stability while meeting genuine

Fong said buyers recognise the potential for long-term price appreciation of Tampines homes.

He highlighted the replacement of Piner Leisure by the River from 2010, which will free up significant land for future housing and amenities, and increase the area's vibrancy.

Ongoing developments in Changi, including the expansion of Changi Airport, the Changi East to District Line and Changi East to

SINGAPORE PROPERTY

1,224 private homes sold at 2 new launches; Tengah Garden Residences 99% taken up at average S\$2,120 psf

Singhaiyi's Vela Bay condo project moves 72% of units at S\$2,886 psf

By Chong Xin Wei
cxinwei@sp.com.sg

TWO highly anticipated suburban condo launches notched more than 1,220 units in sales over the weekend, with Tengah Garden Residences nearing sell-out at an average price of S\$2,120 per square foot (psf).

Vela Bay, the first private residential project in the Bayshore precinct, recorded a 72 per cent take-up rate at S\$2,886 psf.

The strong sales reflect sustained demand in the Outside Central Region (OCR), particularly for well-located and competitively priced projects, said Moham Sandrasegaran, head of research and data analytics at SRL.

In the first quarter of 2026, the OCR led overall new home sales with 916 units, marking its strongest quarterly performance since Q3 2025, when 1,295 units were sold, he pointed out.

Tengah Garden Residences led the weekend sales, with 99 per cent, or 853 of its 863 units sold as at Sunday (Apr 26).

It is the fourth project this year to post a launch take-up rate above 90 per cent. In March, River Modern sold 90 per cent of its units at an average price of S\$3,266 psf, while Rivelle Tampines executive condo

sold about 93 per cent at S\$1,893 psf and Pinery Residences sold 92.5 per cent at S\$2,546 psf.

This run of standout showings is a "strong signal of underlying resilience and buyer confidence" in Singapore's private housing market, said PropNex chief executive Kelvin Fong.

"Demand remains firmly anchored by genuine owner-occupiers and investors, who are taking a long-term view on their property purchase," he said.

"We believe the moderate prevailing interest rates and project pricing discipline in today's market have also provided an environment where buyers are ready to commit, especially for well-located developments with a good value proposition."

Tengah Garden Residences: Blockbuster sale

Tengah Garden Residences is the best-selling project by units since Parktown Residence in February 2025, and the strongest performer by percentage since Skye at Holland in October 2025, said Huttons Asia CEO Mark Yip.

Parktown Residence moved more than 87 per cent, or 1,041 of 1,193 units, at an average price of S\$2,360 psf at launch, while Skye at Holland moved 98.8 per cent, or

Demand was strong across all unit types for Tengah Garden Residences, the first private residential project in Tengah New Town. PHOTO: HONG LEONG HOLDINGS

658 of 666 units, at S\$2,953 psf.

Analysts attributed the strong showing to Tengah Garden Residences' proximity to the future Hong Kah MRT station, on-site retail offerings and first-mover advantage in the developing Tengah estate, which will benefit from planned infrastructure and major employment hubs including the Jurong Lake District.

Demand was strong across all unit types, with transacted prices ranging from S\$1,779 psf to S\$2,340 psf. Singaporeans accounted for 90 per cent of buyers, developer Hong Leong noted.

All unit types were fully sold at launch, except for the largest four-bedroom premium units with yard, which have 10 units remaining.

ERA Singapore CEO Marcus Chu said HDB upgraders, particularly those in Bukit Batok and Choa Chu Kang, drove sales. ERA data showed that the two towns will see a combined pipeline of more than 2,100 HDB three-room and larger flats reaching their minimum occupation period between 2025 and 2028.

Huttons' Yip reckoned that Tengah Garden Residences' "attractive entry price" of S\$980,000, or S\$2,025 psf, for one-bedders and S\$1.1 million, or S\$1,779 psf for two-bedders – comparable to the prices of some EC units in 2026 – appealed to buyers.

Pointing to the developer's S\$821 psf per plot ratio land bid, which is among the lowest in the OCR currently, Chu said the cost

Vela Bay is the first private condominium in the new Bayshore housing precinct. ILLUSTRATION: SINGHAII

savings had been passed on to buyers, contributing to the strong sales performance.

Vela Bay: Healthy take-up

In the east, the 99-year leasehold Vela Bay sold 72 per cent, or 371 of its 515 units at an average S\$2,886 psf, said developer Singhaiyi in a statement on Saturday.

Vela Bay is the first private condominium in the new Bayshore housing precinct and the first major new launch in the area in more than 20 years, following Costa Del Sol in 2000, said PropNex's Fong, adding that the limited supply of new private housing over the period likely led to pent-up demand.

Sales were mainly led by the two and three-bedders, which collectively made up about 83 per cent of the transactions at the launch, said Fong. Two and three-bedroom units were priced from over S\$1.4 million and S\$2.2 million, respectively.

Yip added that all unit types garnered "good interest" from buyers, with one of the two penthouses sold.

One-bedroom plus study units were "almost sold out".

Analysts attributed the healthy showing to a cocktail of factors, including right-sizers from larger homes, investors eyeing long-term rental demand, proximity to Bayshore MRT station and schools.

Justin Quek, deputy group CEO of Realcon (OrangeTree & ETC) Group, reckoned that limited new private residential supply in Bayshore, where about 3,000 private homes are planned, contributed to strong demand.

The success of Vela Bay could set the tone for upcoming developments in the area, said SRI's Sandrasegaran. A mega mixed-use site at Bayshore Drive, which could yield about 1,280 homes, was recently launched, with its tender closing in July.

GuocoLand-led group tops Lentor Central site tender, with S\$1,278 psf ppr bid above expectations

State tender for the private housing site garners five bids

By Kalpana Krishnaswami
krisnap@propnex.com.sg

A STATE tender for a private housing site near Lentor MRT station drew a higher than expected top bid on Tuesday (Mar 3). A six-top including GuocoLand, Intrepid Investments and TIO Residential placed the top bid of S\$657.1 million for the roughly 10-year leasehold private housing site released for the state in the new Lentor Hills Estate in about five years.

The top bid marks out to S\$1,277.21 per square foot per plot ratio (psf ppr), exceeding the S\$980 to S\$1,150 psf ppr analysts had predicted for the top bid in a plot conducted by The Business Times earlier this week.

The state tender for the plot in Lentor Central, near Lentor MRT station, drew five bids, analysts had forecast one to five bids for the site, which can generate about 560 private homes.

The psf ppr price for the top bid at Tuesday's tender is higher than the respective winning bids for the other seven sites sold earlier in Lentor Hills Estate between 2021 and 2023.

Propriety have been launched for six sites.

A 562-unit project, Lentor Gardens Residences, on the seventh site, which was bought by Kingsford at an April 2023 tender close, is expected to be launched this year.

Wong Shanting, head of research at Nomura, said: "The strong participation at the latest tender likely stems from the healthy take-up at the earlier site."

Confidence

Provisional tender results for sites in Lentor Central

RANKING	ADDRESS	ESTIMATED GROSS	TOP BID PPR

2	Intrepid Property Private, Site Asia House and Metro (South Island) Development	S\$750	1,208.48
3	Kingsford Home Development	S\$816	1,130.95
4	CDLI (Singapore) (Cine Cosmos Land Investment)	S\$400	1,051.95
5	Phaivades (Hong Kong)	S\$833	940.55

Note: Number of bidders, comparison of competitive bids

SOURCE: ANALYSTS, GUOCO LAND, KINGSFORD, TIO

projects launched in the new estate, which may have solidified the area's demand fundamentals and boosted developers' confidence in the Lentor Hills precinct.

The higher bid price, compared to the earlier plots, reflects the faster land prices observed in recent government land sales (GLS) exercises.

The top bid at Tuesday's tender for the Lentor Central site was 1.7 per cent above the second highest bid of S\$1,268.48 psf ppr from a consortium comprising Traders Property, Sincere House and Metro (South Island) Development.

In third place was Kingsford Group, which priced the site at about S\$1,130 psf ppr.

A bid of S\$1,051.95 psf ppr, which Kheng Leong Company placed the lowest bid of S\$849.55 psf ppr.

The site is near schools such as Presbyterian High School, Anderson Primary School and C18 St Nicholas Girls' School.

It is beside a site that was

awarded in 2021 to GuocoLand, which has developed it into Lentor Modern, comprising 605 private housing units and a mall. This is the only plot of the site released so far by the state in Lentor Hills Estate that is zoned residential with commercial at the five streets.

GuocoLand's plot
The GuocoLand-led consortium's top bid at Tuesday's tender is 6.1 per cent above the S\$1,204.47 psf ppr forecast for the Lentor Modern site, said Nicholas Mok, chief research officer of Mopli.sg.

He noted that there already are unsold units among the six residential projects totalling 2,074 units in Lentor Hills launched so far. "There is hardly any risk of a housing glut in the Lentor area," he added.

A GuocoLand spokesperson said that if awarded the site, the consortium that it leads plans to build a project with three residential towers that house up to 562 units.

"With a height of up to 27 storeys and the exposure of the site,

none of the units in the development will have unobstructed views of the landed housing estate, Lower Seletar Reservoir or Lower Peirce Reservoir," he said.

"The site's location next to Lentor Modern and Lentor MRT station means greater connectivity and convenience for the residents in the future project,"

Wong Siew Ying, head of research and finance at PropNex, said: "GuocoLand, Hong Leong Holdings and TIO have collectively been involved in four of the six new launches in Lentor Hills estate, which gives them a deep understanding of the precinct and demand dynamics."

CRRE's head of research for Singapore and South-east Asia, Tricia Song, said that with the top bid price of S\$1,278 psf ppr for the latest plot, "the developer could look to launch the project on the site at an average price of S\$2,358 to S\$2,450 psf."

According to data collated by CRRE, median new sales prices for the projects sold so far have ranged from S\$2,038 for Lentor Modern, launched in September 2022, to S\$2,262 for Lentor Mayana, launched in March 2024.

Huttons Asia CEO Mark Yip

said that the Iraq War in 2003 did not have an impact on Singapore property prices. He went on to suggest that with the current war between the US, Israel and Iran, "it would not be a surprise to see more wealth coming to Singapore and contributing to demand for properties."

"The luxury property market may see a steady increase in demand should the conflict be prolonged," he added.

Huttons' Wong, however, sounded a note of caution. Heightened geopolitical uncertainty arising from the Middle East war will likely revive inflationary pressures. "The recent rise in oil prices will likely translate into higher construction costs, as globalised energy and logistics expenses trickle through the supply chain, driving overall development costs higher," she said.

Set within a predominantly private housing area in Ang Mo Kio Planning zone, Lentor Hills Estate is bordered by Lentor East to the north, Teachers' Housing Estate to the south, Sengkang East to the west and a mix of private and public housing to the east.

First GLS site in Bayshore draws eight bids, SingHaiyi puts in top bid of \$1,388 psf ppr

Atiqah Mokhtar / EdgeProp Singapore

March 18, 2025 7:12 PM SGT

propertyeditor@edgeprop.sg

Taking into account the top bid of \$1,388 psf ppr, she predicts the future development at the Bayshore Road site could see an average selling price of over \$2,600 psf. Meanwhile, Knight Frank's Tay believes prices at the upcoming project could start from \$2,700 psf and average above \$2,800 psf.

Upper Thomson Road

SINGAPORE – GuocoLand ended last week at a five-year high after recording a 92 per cent take-up rate on the launch weekend of Springleaf Residence.

Shares of the developer closed at \$1.84 on Aug 22, up 2.8 per cent through the week.

It had sold 870 out of 941 units at its Upper Thomson project at an average of \$2,175 per square foot (psf). Prices at the development start at \$1,995 psf, with one-bedroom units of 388 sq ft starting at \$878,000, or \$2,263 psf.

ed units will be pegged to market pricing at the time of launch. At a land price of \$1,202 psf ppr, the break-even cost for the Zion Road project could range between \$2,400 psf and \$2,600 psf, with launch prices seen starting from \$2,700 psf, Mr Leonard Tay, Knight Frank Singapore's head of research, said.

The \$905 psf ppr land rate of the Upper Thomson Road site will likely translate to a launch price of just under \$2,000 psf, he added.

The land price sold will determine the future selling price

If developers pay more for land, can the next launch easily be cheaper?

Is It the Right Time?

3 FORCES TO WATCH

Context: Removal of the 15-month wait-out period
Private homeowners can now buy HDB resale flats immediately.

Key Impact: More flexibility for right-sizers and down-graders, shifting some demand back to the HDB resale market.

1 CAPITAL & WEALTH

Is there money to buy?

- ✓ Economy continues to grow
- ✓ Wealth & confidence improve
- ✓ More capital looking for returns

THE STRAITS TIMES

S'pore raises 2026 GDP growth forecast to 4.5%–5.5% on AI boom

More wealth today
can create more buyers tomorrow.

2 INTEREST RATES & DEMAND

Will more buyers return?

- ✓ Interest rates have come down
- ✓ Financing becomes more affordable
- ✓ More buyers can enter the market
- ✓ Demand could increase

FIXED & FLOATING HOME LOAN RATES (%)

Fixed 2-yr 3M SORA

Source: Various banks, MAS

PRIVATE RESIDENTIAL PRICE INDEX (QOQ % CHANGE)

6 quarters of muted price growth
≤ +1% QOQ

More affordable financing
can bring more buyers back.

3 SUPPLY & REPLACEMENT COST

Can future homes be cheaper?

- ✓ Unsold stock remains manageable
- ✓ Land prices remain high
- ✓ Construction costs remain elevated
- ✓ Developers' replacement cost is higher
- ✓ Future new launch prices under pressure

UNSOLD STOCK FELL TO 14,929 UNITS (Q2 2026)

Me&MyProperty

Property investment is about choosing a home, not just a house

Every investment is an artistic adventure, says leadership development coach

Choo Yun Ting

Leadership development and executive coach Fiona Wong-Kautz has bought six properties in the past 15 years, but choosing one has always been about a home rather than just bricks and mortar.

Ms Wong-Kautz, who started bespoke furniture outfit +49 Woodcraft in 2004 with her husband Till Oliver Kautz, 36, also sees every investment as an artistic adventure. "Each time I scout the property market, it's like looking at possible canvases to rework and to beautify," she says.

Over time, her urge to do up new spaces meant she settled into a nomadic life, working around property rules, making profits on her housing investments and enjoying the process of decorating new spaces at the same time.

Ms Wong-Kautz, 43, holds a bachelor's in environmental science and previously worked as a credit and risk analyst at a private bank.

She prefers to do research on her own, rather than rely on real estate agents as "nobody knows my needs or thoughts better than myself".

"Property knowledge is more accessible today, and, coupled with your own market intuition, you will know if you are getting a good deal," she notes, adding that she uses property research app ProperHome to look at homes in targeted districts although she does not dismiss real estate agents entirely.

"Where I find agents useful is their familiarity with a project and their ability to find units that are not yet listed or were listed but had been back from the market," said Ms Wong-Kautz, who has a three-year-old daughter.

Besides her home in Singapore, she owns a unit in Kuala Lumpur which is rented out. She is always on the lookout for a good deal and is exploring opportunities on the east coast of Australia, parts of Europe and Asia.

Ms Wong-Kautz also frequently borrows property websites from Australia, Europe and the United States.

"Just love looking at homes?"

Q Describe your residential property
A Our home is a 1,250 sq ft condominium unit with three bedrooms, two bathrooms and a large living, dining and kitchen space. It was purchased in 2017 for \$1.3 million.

When I choose a property, location is the biggest draw. Space and layout are important, and how I feel when I first walk into the compound and the apartment makes or breaks the deal for me.

I chose this apartment in Telok Blangah for several reasons - my first home was located in Telok Blangah as well, and this place is close to my future parents, who also live in this area.

I also love the quietness of this old neighbourhood and how it is so

Ms Fiona Wong-Kautz with her husband Till Oliver Kautz and daughter Sophie Rae Kautz. "Each time I scout the property market, it's like looking at possible canvases to rework and to beautify," says the leadership development and executive coach, who has bought six properties in the past 15 years. "I've never intentionally flipped my homes for monetary gains," she says. (F. Wong-K. / Singapore Business)

Home for Ms Wong-Kautz is now a condominium unit at Harbour View Towers in Telok Blangah. When it comes to investment in properties, Ms Wong-Kautz, who in 2014 started bespoke furniture outfit +49 Woodcraft with her husband, says she is always on the lookout for a good deal.

convenient. It is close to train stop from VivoCity and walking distance to a wet market, food centre and numerous local shops.

Also, if I need to rent out this apartment for whatever reason, I believe it will be rather easy to do so, given the proximity to both the Central Business District and Mapletree Industrial Park.

I love the entirety of our home. If I were to map out our movements in it, I wouldn't be surprised to see that every area is well "visited" on a daily basis.

Q What's in your property portfolio?
A This property that I am living in is my sixth purchase.

In 2006, I bought a 1,650 sq ft condominium unit in Meyer Road for

about \$880,000. I sold it for a tidy profit two years later.

My second purchase was a 1,033 sq ft walk-up apartment in Binjai Park in 2008 which was very fun to make over. It was well located and I sold it for a \$200,000 profit.

The third unit was a 1,066 sq ft condominium in the vicinity of Clementi Park and Upper Bukit Timah. It was purchased in 2010 for \$900,000 and sold within two years for a decent profit.

My fourth unit was my first foray into new apartments. The 797 sq ft unit at Bartley Residences was purchased in 2012, rented out for a small profit.

If I had the choice, I would have kept it, but the additional buyer's

stamp duty I had to pay to get a second home didn't make sense, so I sold it in exchange for my current home.

The fifth unit is at Eon City Vogue Suites in Kuala Lumpur. It is a 797 sq ft apartment which was purchased for \$300,000. I still own it and it is rented out.

The sixth unit, my current abode, was purchased in 2017. I plan to hold on to it for a while.

Third, I must be inspired when I walk into the space. I have to see possibilities and beauty in it. There were times when I visited places that felt heavy or oppressed. I knew instantly those were not the right homes.

Fourth, it should not tie me down. I want the option of long-term stay, potential rental possibilities or capital return in the longer run.

Q What's your financing strategy?
A Borrow as cheaply as you can, with as short a lock-in period as possible. Because cash flow is fluid, you've got to ensure you keep nimble by managing your portfolio the way

I would also not borrow more than 60 per cent of the property's valuation price and that's just a personal discipline to manage cash flow and risk.

I use traditional home loans as well as short-term loans against my portfolio to finance my property purchases. It really depends on the market and what's on offer.

I do not recall doing any refinancing in the past, but just did so this year as the fixed rates I had contracted are pretty good for the next two years.

Q What's your overall investing strategy?

A When I was 16, I invested in an equity mutual fund from a large fund house. I attended their talks and had to get my dad to endorse my very first investment. The fund gave pretty solid returns and I was very pleased with that.

After spending almost 12 years in the banking industry and with countless investments made, my appetite has morphed. I dabble in listed equities, equity options, bonds, foreign exchange, mutual and hedge funds, commodities, property and select businesses in the form of private equity.

Currently, I'm sitting on some cash as a few of my bonds have matured, and in this low interest rate environment, it does not yield good returns so I will need to work my cash by investing in private markets and in direct deals such as fund-start-ups or small and medium-sized enterprises needing equity.

Q Moneywise, what were your growing-up years like?

A I'm from a middle-class family where my dad spent many years as an investment banker focusing on mergers and acquisitions, while my mum is a housewife. I have two siblings who live overseas.

We had rather comfortably travelled annually and moved every two to three years when my dad sold the house we lived in for profit. So, in a way, I'm very much like him.

Q My dream home is...

A A self-designed cosy and stylish 2,000 sq ft home on elevated land with a view. It would have three bedrooms and an office, a living area with a good kitchen and dining space. A proper laundry room with a work shed would be great. There would be a patio for barbecues and a well-sized garden where we grow our own vegetables and treat a few hens.

My husband would most likely build everything in the house and I would design a fully off-grid and carbon-neutral utility system where we'd generate our own electricity through a combination of biofuels and plastic waste from our home, wind and solar energy, and use well water from the ground and rain. Being truly self-sustainable would be a nice goal to achieve.

The home would be backed by natural forest and fronted by the ocean, country with some form of seasonality. I love nature, and being close to it brings a certain calm and humility to life. The longer I live, the more I focus on living a fuller life and less on the accumulation of material things. I would like my home to reflect that.

I have a mortgage on my property, but it is out of personal choice in the current low interest rate environment.

They Key Difference Between Resale & New Launch?

Valuation

**Question how to identify
opportunity in 2026 for
Development?**

BUY INTO THE V SHAPE WINDOW

The sweet spot to buy low and future-proof your wealth.

IS IT NOW?

Right time,
right conditions,
right opportunity.

FUTURE PROOF

Stronger value,
more growth,
greater security.

BUY LOW
(NEW / RESALE)

Buy smart. **Buy in the V.** Build wealth with confidence.

SUPER SUPER UNDERVALUE PROPERTY TODAY

**Is the Pricing

Sens, does it
make Sens
Fr \$22xxpsf**

Average unit price (\$PSF) of new non-landed private homes sold

New Sale Non-Landed Private Homes by Region - Average Transacted Unit Price (\$PSF)

Source: PropNex Research, URA Realis (Q3 2026 data up to 19 Jul 2026)

OCR New Launches not near MRT Transacted Price

RCR New Launches (Not Near MRT)

M Oct 24 - Oct 25

Non Harmonize Resale OCR

M Oct 24 - Oct 25

NEAR MRT ≠ GUARANTEED PROFIT

Large-project resale outcomes show why MRT proximity should not be assessed in isolation.

NEAR MRT

NOT BESIDE MRT

URBAN VISTA Tanah Merah MRT	134 PROFITABLE	56 UNPROFITABLE
ECO Tanah Merah MRT	152 PROFITABLE	40 UNPROFITABLE
RIVERFRONT RESIDENCES Hougang area	561 PROFITABLE	0 UNPROFITABLE
HIGH PARK RESIDENCES Thanggam LRT / Sengkang	391 PROFITABLE	0 UNPROFITABLE

MRT IS A DEMAND DRIVER. IT IS NOT A PROFIT GUARANTEE.

ENTRY PRICE • EXIT BUYER • COMPETITION • DEMAND • MARGIN OF SAFETY

The Sens**

BE AHEAD OF TIME. BE IN THE LEADING, NOT THE LAGGING.

LEADING

Know earlier. Decide smarter.

SEE THE FACTS EARLY

Understand trends before others.

MAKE INFORMED DECISIONS

Facts over emotions.

BETTER VALUE

Buy right, pay only for what you use.

MORE OPTIONS

More choices today, more control tomorrow.

VS

LAGGING

React late. Pay more.

REACT TO NEWS

Information comes late, options are limited.

EMOTIONAL DECISIONS

Fear, rush or FOMO leads to mistakes.

PAY MORE FOR LESS

You may pay for areas you can't use.

FEWER GOOD OPTIONS

Good units, good prices are already gone.

LEAD TODAY. WIN TOMORROW.

LAG TODAY. REGRET TOMORROW.

GFA HARMONISATION
STARTED ON
1 JUNE 2023

TODAY, YOU PAY ONLY
FOR YOUR LIVING SPACE.
AIR-CON LEDGE IS INCLUDED
AT NO EXTRA COST.

KNOW EARLIER.
DECIDE SMARTER.
LIVE BETTER.

A low-angle, upward-looking shot of several modern skyscrapers with glass facades. The buildings are reflected in each other's windows, creating a complex, layered effect. The sky is a deep blue with some light clouds, and the sun is setting or rising, casting a warm, golden glow that reflects off the glass surfaces and creates a lens flare effect at the bottom center. The overall color palette is dominated by blues and oranges.
